

Würfelbilder

Strukturierte Darstellung von Mengen.

Es gibt 2 Möglichkeiten

Als Arbeitsblätter vorlegen

1. Nur die grünen Punkte zusammenzählen.
Kinder fragen: Welche Rechenaufgabe seht ihr?
2. Immer auf 10 ergänzen
Wieviele grüne Punkte seht ihr?.....8
Wieviele fehlen auf 10?.....2

Als Spiel verwenden

Die Kärtchen mehrmals ausdrucken , laminieren und ausschneiden
Nebeneinander verdeckte Stapel mit Würfelbildern und Zahlenbildern. In der Mitte ist eine Klingel wie bei Halli-Galli. Jeder der 2 Spieler deckt nach und nach seine Karten auf und klopft auf den Tisch oder auf die Klingel, wenn Zahlen- und Würfelbild zusammenpassen. Der Schnellere bekommt einen Punkt. Es wird so lange gespielt, bis mindestens 1x der Stapel verbraucht wurde.
