

Achtung! Zur exakten und passenden Darstellung wird die Schriftart „LaborB“ benötigt.

Bsp.: Ziffer 1:

Ziffer und „Punktmenge“ mit Knetmasse „auslegen“. Wichtig ist der „Ablauf“ in Schreibrichtung.

Die „erhobene Form“ wird mit offenen und geschlossenen Augen befühlt (Richtung beachten). Der „Mengenpunkt“ wird zugeordnet („inneres Bild“).

Anschließend erfolgt die 1. Schreibübung – „große Ziffer“ mit Filzstift.

Material Seite 26

Die Ziffer wird mit Pinsel und Leim (günstig: weißer Bastelkleber) in Schreibrichtung „eingepinselt“ und mit feinem Vogelsand bestreut. Ebenso der „Mengenpunkt“.

Nach der Trocknung Ablauf wie vorher.

Anschließend erfolgt die 2. Schreibübung – „mittelgroße Ziffer“ mit Bleistift.

Material Seite 26

Die Ziffer und der „Mengenpunkt“ wird mit Pinsel und Tusche „ausgemalt“.

Anschließend erfolgt die 3. Schreibübung – „kleine Ziffer“ mit Füller.

Material Seite 26

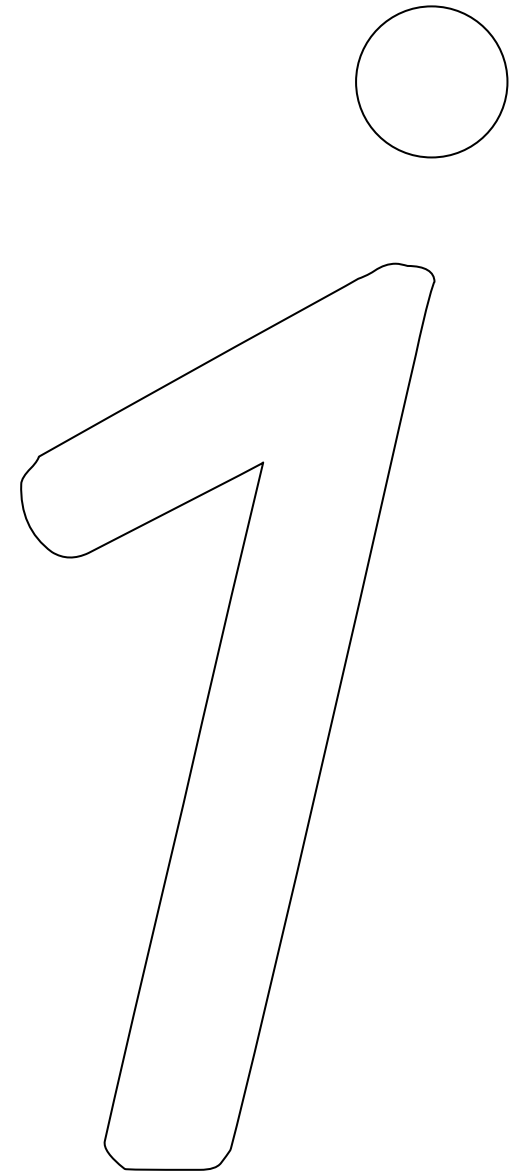

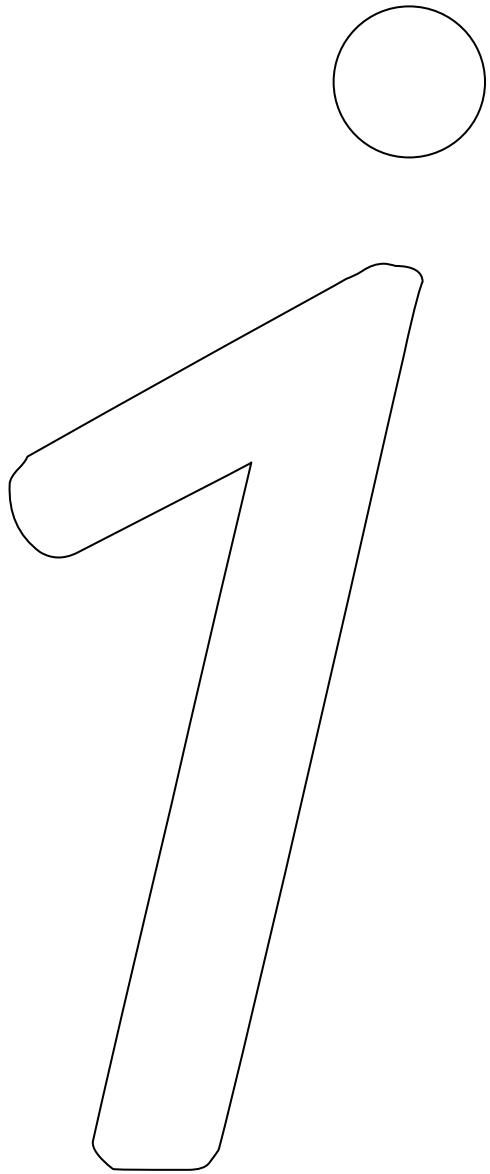

Die Ziffer wird mit den vom Trainer vorbereiteten Puzzleteilen belegt und dann aufgeklebt.

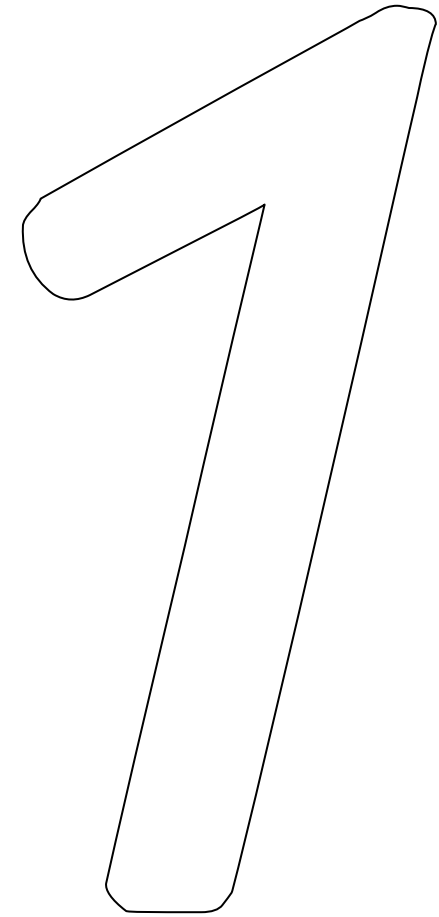

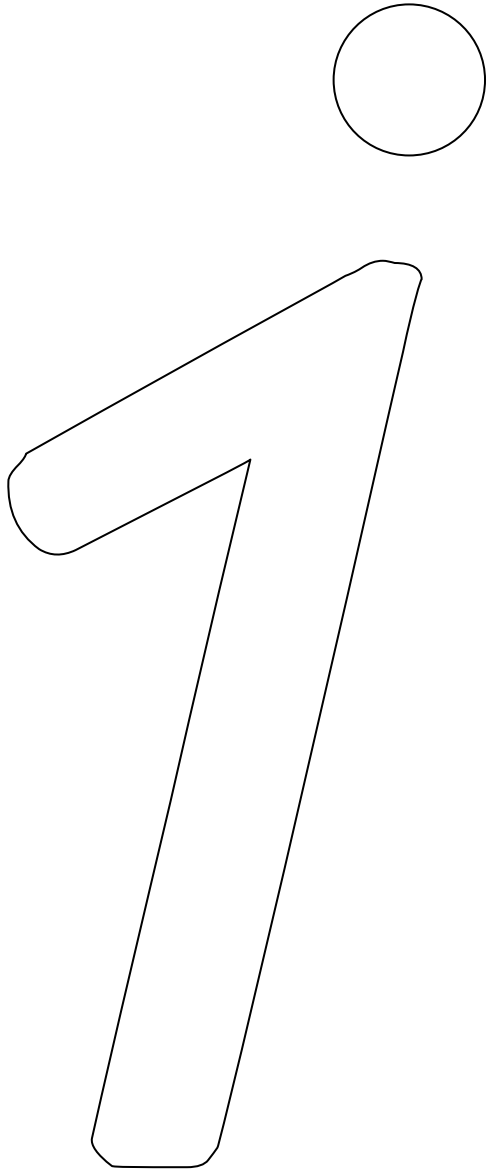

Material Seite 22

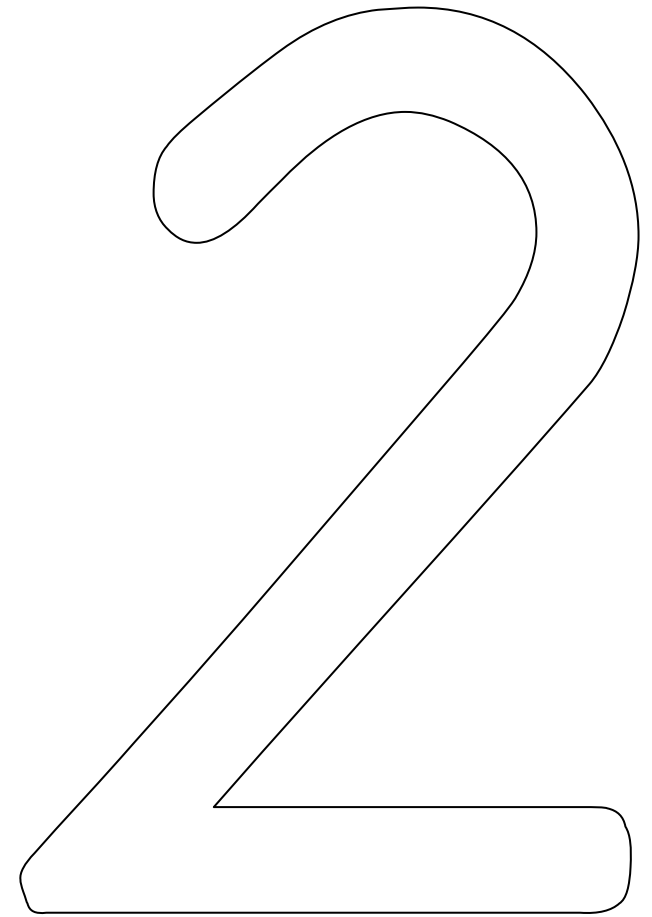

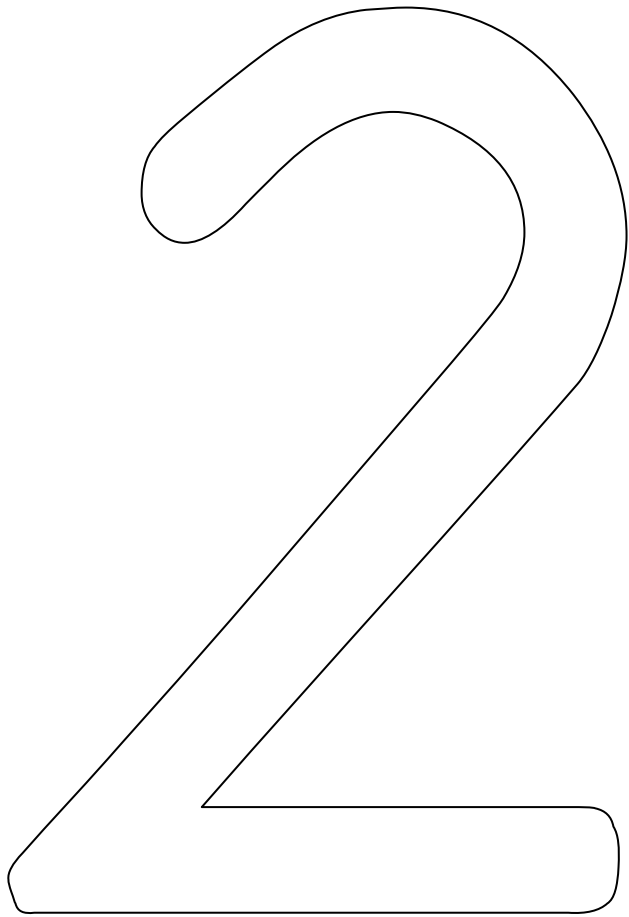

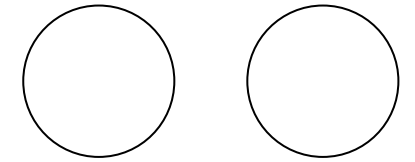

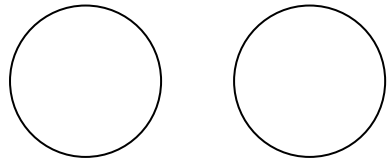

Anschließend erfolgt die Bearbeitung des Arbeitsblattes zur 1.

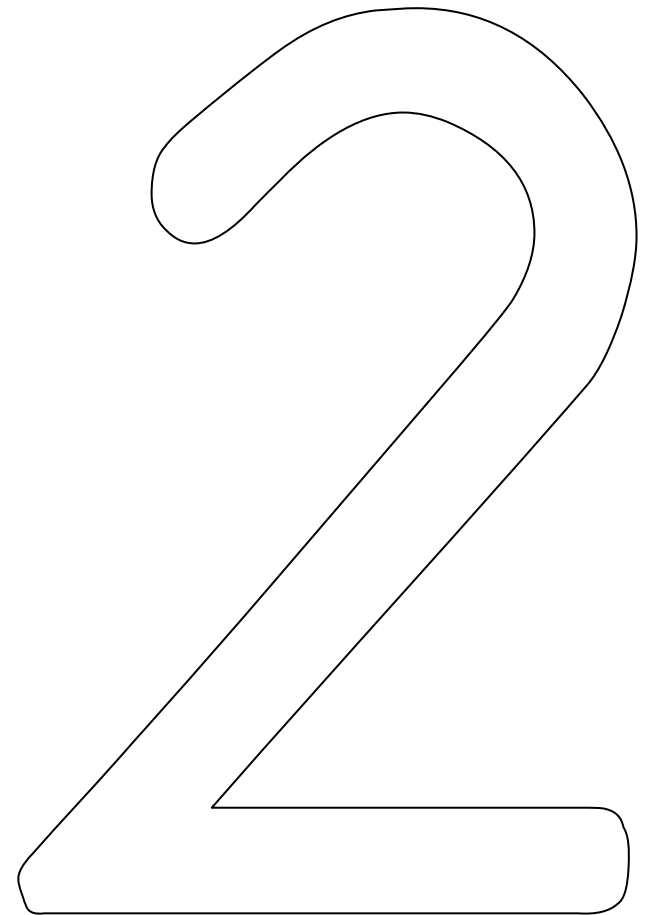

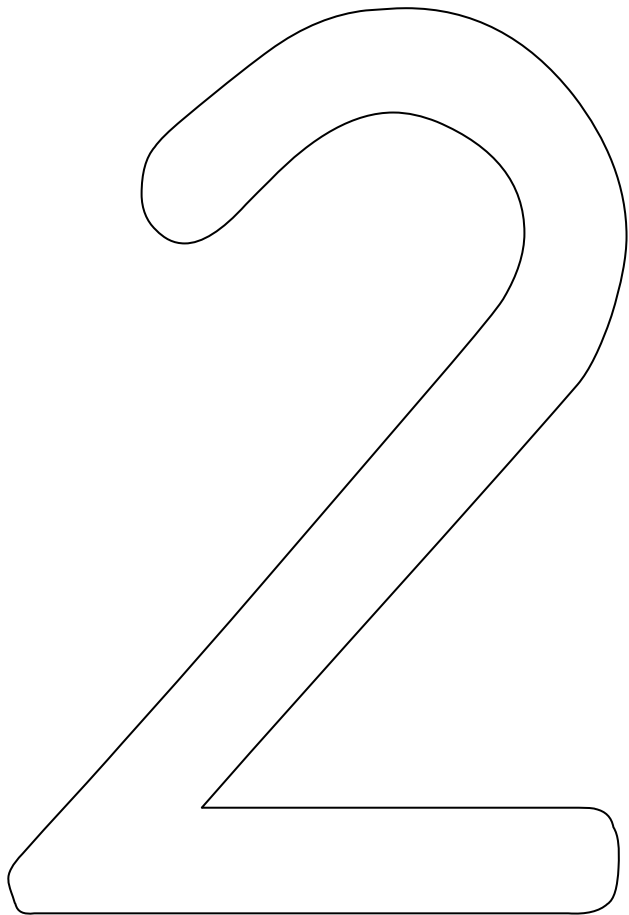

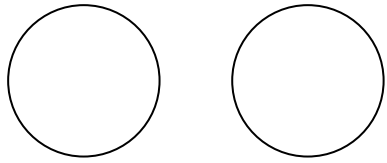

Material ab Seite 28

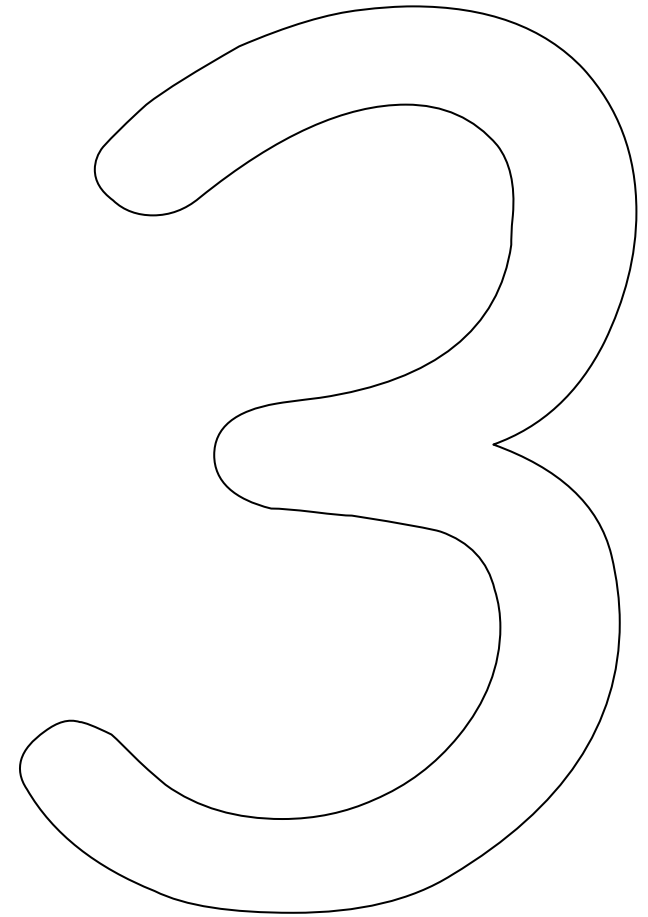

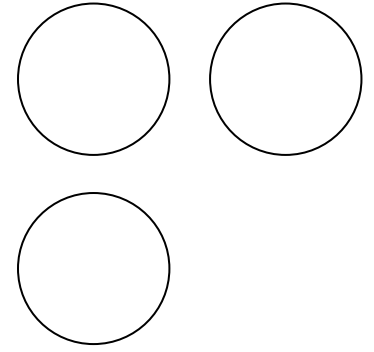

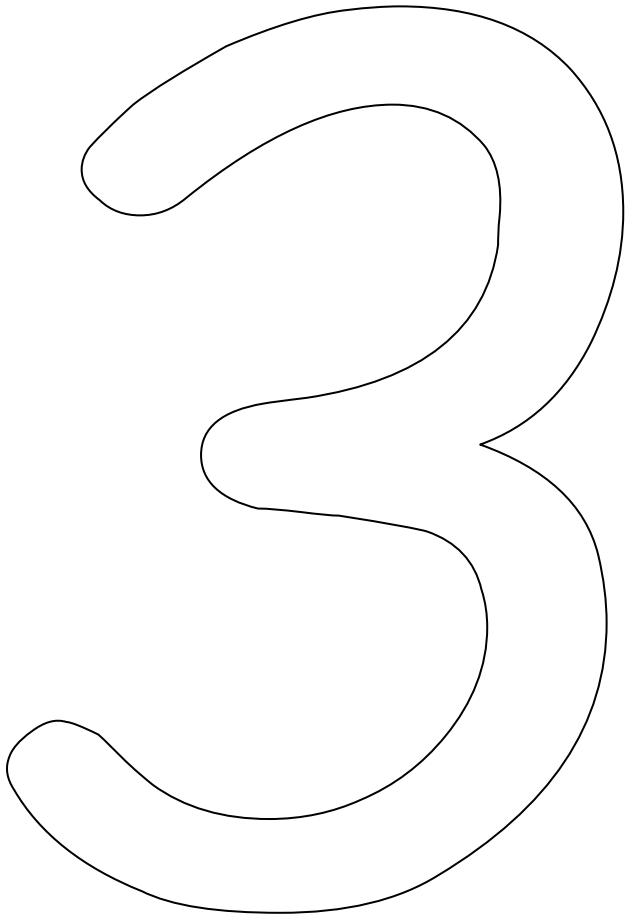

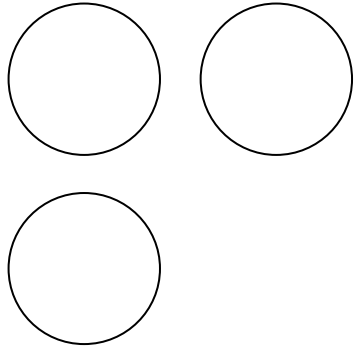

Man kann die verschieden gestalteten Ziffern, die Schreibübungen und Arbeitsblätter wie „Plakate“ (A3) zusammenfassen und benutzt sie weiter als „Erinnerungshilfe“, zum „Befühlen“ und zur Motivation. Der Ausdruck auf etwas stärkerem Papier ist dafür günstiger.
